

BRINGING SKYPE FOR BUSINESS OR MICROSOFT TEAMS TO YOUR MEETING ROOMS WITH POLYCOM

Experience the power of Polycom High Definition (HD) Video Conferencing and content collaboration combined with the ease and familiarity of Office 365.

Delivering the Microsoft Teams or Skype for Business user interface across Polycom devices

means it's easier for users to meet via Microsoft video conference from anywhere – on any device. Direct integration with Office 365 means that users can easily access contacts, schedule meetings, and click to join a Teams or Skype call without missing a beat or breaking their normal workflow.

SUPER-SIMPLE TO START A MEETING

Nothing deflates a group meeting quite like messing around with dial-in numbers, PC audio settings or adapters. Video solutions for Microsoft Teams and Skype for Business should extend the familiar Microsoft workflows and UX to the meeting room, so your users can get started with one touch. **Book the room, click "Join", and that's it.**

SHARE CONTENT LIKE A CHAMP

Microsoft UC solutions make it easy to share content from your device, but sharing to and from meeting rooms can be challenging. **Your room solution should make it easy to share instantly, so your team can collaborate effortlessly.**

3. ONE SOLUTION. MANY POSSIBILITIES.

UNIFIED COMMUNICATIONS FOR BUSINESS

The power of complete Unified Communications with Skype for Business or Microsoft Teams. A world of powerful business collaboration; The power of NFON and Polycom.

Whether calling from a laptop, mobile phone, desk or conference room, you'll want the devices that are integrated with Microsoft to show your users' calendars and favourite contacts, making it super-simple to join with a touch

TODAYS CHALLENGES

73%
Indicate video conferencing is important to their daily business operations*

Today's conference rooms often have a "Frankenstein" approach to collaboration—disparate solutions that may or may not work well together, or they may not have any technology at all.

NFON WITH FULL SKYPE FOR BUSINESS PBX INTEGRATION

TRY THE INTEGRATION FOR YOURSELF WITH OUR FREE 21-DAY TRIAL

Without the integration of a telephone system, Skype for Business can't deliver a truly unified communications experience. The integration of NFON's Cloud Telephone System enables you to use Skype for Business or Teams as your complete communications platform.

Business's or Teams core features, such as instant messaging and video – simply and cost-effectively.

For the first time, through a single solution, you can deliver all the telephony features and the collaboration tools your users need – whatever your business activities, wherever your people are based, and however they work. You can unify and simplify your communications systems while delivering an enhanced experience for your employees and your customers.

Now you can combine the functionality provided by an enterprise telephone system with Skype for
