## WELCOME TO NORTHERN CAM

Since 1977, Northern Cam has been providing a high-quality precision engineering service to a diverse range of industries throughout the world. Many of these industries require specialist components that perform in demanding environments.

Today, as then, we are still a family-owned business. Our commitment to investing in the best technology, manufacturing quality products, employing knowledgeable people and insisting on high levels of customer service is in our opinion the four pillars to our success.

### OUR CUSTOMERS ARE AT THE HEART OF WHAT WE DO

Customer service is to us simple... If we don't take care of our customers and ensure open clear lines of communication are available alongside quality products, then we as a business would not survive. Having been established since 1977 while growing as a business year on year, demonstrates our ability to care for and retain customers.

To support our great customer service, we have a highly experienced and knowledgeable team to advise customers on new product development and re-orders.

We are proud to be able to provide competitively priced components in rapid response times without compromising quality.

### CAPABILITIES

Our capabilities include 3 and 4 axis CNC machining, milling, turning, grinding and deburring.

With over:

- 2 CNC Sliding Head Lathes,
- 13 CNC Bar Machines with Live Tooling,
- 8 CNC Chucking Lathes,
- 16 Vertical Machining Centres,
- 2 High Speed Saws,
- Quality Inspection Equipment Including CMM,
- Assembly and Testing Facilities.

In addition to our UK capabilities, we are one of the few UK suppliers to have our own manufacturing base in India and an established, strong and reliable supply chain from China.

### MATERIALS

Our machining capabilities include producing components in Brass, Aluminium, Stainless Steel, Steel, Bronze, Copper and Plastic.

## QUALITY

Northern Cam has built an invaluable reputation for quality and service. We provide superior service by managing all aspects of the business to rigorous standards and have full traceability throughout our management systems.

Quality is never compromised, and our procedures and processes are continually reviewed and improved to ensure that our customers receive products and services to the highest standard. Our impressive inspection facilities include high quality digital and conventional gauges and instruments, co-ordinate machines and a shadowgraph.

We welcome our customers to visit our manufacturing facility to inspect our capabilities for themselves.

## ACCREDITATIONS

From quotation to delivery, every aspect of our work is covered and maintained by a solid company ethos in quality. This is backed up with our annual certification to internationally recognised ISO 9001:2015 standards.
